| 6. Monitoring, Reporting, and Escalation .....                           | 9  |
| 6.1 QA Risk Register .....                                               | 10 |
| 7. Alignment with HESF (Threshold Standards) 2021 .....                  | 10 |
| 8. Continuous Improvement Cycle .....                                    | 11 |
| 9. Document Approval and Review Schedule .....                           | 11 |
| Document Control .....                                                   | 12 |

## 1. Purpose

The Academic Quality Assurance Framework (AQAF) provides the integrated, systematic, and evidence-based approach by which The Institute of International Studies (TIIS) assures, monitors, and continuously improves the quality of its academic programs, teaching practices, assessment standards, student outcomes, and governance processes.

This Framework ensures TIIS academic operations are aligned with:

- Higher Education Standards Framework (Threshold Standards) 2021 (HESF) — Domains 1, 2, 3, 5, 6, and 7
- TEQSA Quality Assurance Guidelines and Regulatory Risk Assessment Framework
- Australian Qualifications Framework (AQF) — Levels 7, 8, and 9
- National Code of Practice for Providers of Education and Training to Overseas Students 2018
- TEQSA Provider Registration Standards for ongoing registration renewal

## 2. Scope

This Framework applies to all higher education programs registered with TEQSA and delivered by TIIS (face-to-face, blended, or online); all academic and professional staff involved in learning design, teaching, assessment, and student support; programs delivered through third-party or articulation arrangements where TIIS retains academic governance responsibility; and all governance structures including the Academic Board, Learning and Teaching Committee (LTC), Board of Examiners, and Academic Dean's office.

**The five programs currently in scope are:**

- Master of Business Administration (MBA)
- Master of Professional Accounting & ACCA (MPAA)
- Master of Cyber Security (MCS)
- Bachelor of Information Technology (BIT)
- Bachelor of Business (BBUS) — additionally governed by a formal Academic Recovery Plan (ARP) under Section 5.1

## 3. Core Quality Assurance Principles

| Principle                             | Application at TIIS                                                                                                                                                                       |
|---------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Continuous Improvement</b>         | Formal Annual Program Review (APR) and pass rate threshold trigger policy ensure improvement actions are systematically identified, implemented, and tracked against measurable outcomes. |
| <b>Evidence-Based Decision Making</b> | All quality decisions are grounded in quantitative data (pass rates, progression, retention) and qualitative evidence (SELT surveys, peer review, moderation outcomes).                   |
| <b>External Referencing</b>           | Programs are benchmarked annually against comparable Australian providers. External academic advisors participate in all major course reviews.                                            |
| <b>Stakeholder Engagement</b>         | Students, alumni, industry partners, academic staff, and regulatory bodies are meaningfully engaged in program design, delivery, and review.                                              |

|                                        |                                                                                                                                                                                  |
|----------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Transparency and Accountability</b> | All QA processes, governance decisions, and performance outcomes are documented, reported through formal channels, and accessible to TEQSA on request.                           |
| <b>Equity, Diversity and Inclusion</b> | Student performance data is routinely disaggregated by CALD status, English proficiency, domestic/international status, and gender to identify and address systemic equity gaps. |

## 4. Framework Components

The AQAF encompasses twelve interconnected quality domains. Each domain specifies governing policies, key practices, evidence base, responsible parties, and reporting obligations.

### 4.1 Curriculum Design and Approval

*Governed by: Course Design and Development Policy; Unit Design Policy; AQF Mapping Guidelines; HESF Standards 3.1, 3.2*

- All program learning outcomes are explicitly mapped to AQF level descriptors and HESF Domain 1 graduate qualities prior to Academic Board approval.
- New programs and major curriculum changes require industry and student consultation, external expert review, and documented evidence of graduate attribute alignment.
- Delivery mode (face-to-face, online, blended) is reviewed at each major course review cycle to confirm mode-appropriateness.
- All programs must demonstrate coherent curriculum architecture showing prerequisite structure, knowledge scaffolding, and capstone integration.

|                        |                                                                                                                                                                                                                                                                                   |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>New Requirement</b> | <i>Curriculum review is automatically triggered for any subject averaging below 70% over three consecutive offerings. Curriculum referral to the LTC is mandatory within 20 working days. This applies immediately to BB101, BB102, BB103, BB105, MPA503, BIT105, and BIT106.</i> |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

### 4.2 Learning and Teaching Quality

*Governed by: Learning & Teaching Plan; CPD Policy; Teaching Evaluation Policy; HESF Standards 3.2, 3.3*

- All teaching staff hold qualifications at least one AQF level above the subjects they teach, consistent with HESF Standard 3.2.3.
- Peer observation of teaching is conducted for all staff annually, with formal written feedback and CPD recommendations where performance is below standard.
- Student Evaluation of Learning and Teaching (SELT) surveys are administered each teaching period; results are analysed by the LTC and shared with subject coordinators.
- Teaching staff delivering persistently underperforming subjects are subject to a formal Teaching Quality Review, which may include mandatory CPD, co-teaching, or subject reassignment.
- Learning technologies (LMS, video lecture tools, AI-assisted feedback tools) are reviewed annually for fitness for purpose and accessibility compliance.

|                        |                                                                                                                                                                                                                                                                                                                                                                                 |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>New Requirement</b> | <i>A Teaching Quality Investigation is now formally codified. Where a subject records a pass rate below 60% in any single offering, the Unit Coordinator must submit a Teaching Reflection Report to the Academic Dean within 10 working days. Where pass rates are below 70% across three consecutive offerings, a formal Teaching Quality Review is initiated by the LTC.</i> |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

### 4.3 Assessment Design and Moderation

Governed by: *Assessment Policy; Moderation Guidelines; Rubric Standards; HESF Standards 1.4, 1.5*

- All assessments must be mapped to subject learning outcomes and AQF level descriptors in an Assessment Mapping Grid prior to subject delivery.
- Pre-moderation (assessment design review by a second marker or panel) is mandatory for all summative assessments.
- Post-moderation (blind double-marking of at least 10% of submissions, or all submissions in small cohorts) is required each teaching period.
- Standardised rubrics are developed for all assessment types and published to students with assessment briefs. Rubrics are mandatory across all MPAA subjects effective Term 2, 2026.
- Assessment feedback must be returned to students within 15 business days of submission; compliance is tracked by the Registrar each period.
- The Board of Examiners reviews grade distributions for all subjects each period; anomalous distributions trigger investigation.

#### New Requirement

*Inter-offering variability review is now a formal process: where a subject's pass rate varies by more than 25 percentage points between any two consecutive offerings, the Program Director must submit a Variability Report to the Board of Examiners within 15 working days. This directly addresses variability identified in MPA502, MPA503, MPA504, and BB105.*

### 4.4 Student Progress, At-Risk Identification, and Academic Support

Governed by: *Academic Progress Monitoring Policy; Student Intervention Framework; Learning Support Strategy; HESF Standards 2.2, 2.3*

- An automated at-risk flagging system identifies students tracking below 50% after the first assessed task; this triggers mandatory academic counselling outreach within 5 business days.
- Academic progress is formally reviewed at mid-term for all students enrolled in subjects with documented pass rate concerns.
- Targeted support programs are offered each term, including academic writing workshops, numeracy bridging modules, English language support, and study skills programs.
- Students from CALD backgrounds and those with English proficiency below IELTS 6.5 equivalent are offered embedded language support within core subjects.
- Completion, retention, and withdrawal data is reported to the LTC each semester; trends diverging from prior year baselines trigger a formal review.

#### New Requirement (BBUS)

*Under the BBUS Academic Recovery Plan, the at-risk threshold is raised to below 60% after any assessed task. Academic counselling must be completed (not merely offered) within 5 working days. Non-attendance at counselling is escalated to the Program Director.*

### 4.5 Pass Rate Performance Standards and Threshold Trigger Policy

Governed by: *Pass Rate Threshold Trigger Policy (adopted March 2026); Academic Recovery Plan Procedure; HESF Standards 5.3, 5.4*

TIIS adopts the following formal pass rate performance standards, consistent with TEQSA's generally accepted benchmark of  $\geq 80\%$  at the program level:

| Trigger Level           | Threshold                   | Mandatory Response                                                                                                                                    |
|-------------------------|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Immediate Review</b> | <60% in any single offering | Unit Coordinator submits Teaching Reflection Report within 10 working days. LTC reviews curriculum, assessment, and staffing. Academic Dean notified. |

|                               |                                             |                                                                                                                                                                                              |
|-------------------------------|---------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Formal Intervention</b>    | <70% average across 3 consecutive offerings | Mandatory curriculum review by LTC within 20 working days. Revised subject outline to Academic Board. External review considered.                                                            |
| <b>Academic Recovery Plan</b> | Program overall pass rate <80%              | Academic Dean initiates formal ARP within 10 working days. ARP to Academic Board within 30 days. Quarterly reports mandatory. TEQSA notified if below threshold for 2+ annual review cycles. |
| <b>Monitoring</b>             | Program pass rate 80–84%                    | Program on Annual Monitoring status. Program Director submits improvement plan to Academic Board each semester.                                                                              |
| <b>Satisfactory</b>           | Program pass rate ≥85%                      | Standard Annual Program Review applies. No additional action unless subject-level anomalies are identified.                                                                                  |

#### 4.6 Annual Program Review (APR)

*Governed by: Annual Program Review Policy (adopted March 2026); HESF Standards 5.3, 5.4*

Effective 2026, all five TIIS programs are subject to a formal Annual Program Review (APR) each calendar year. The APR replaces the former biennial monitoring cycle. Each APR must include:

- Three-year pass rate analysis at both program and subject level, with trend commentary
- Student evaluation data (SELT) summary and analysis of actionable themes
- Progression, retention, and withdrawal data disaggregated by student cohort characteristics
- Graduate outcomes and employability data (where available)
- External benchmarking summary against at least two comparable Australian providers
- Status of all curriculum review and improvement actions carried forward from the prior year
- Recommendations for the coming year, with responsible owners and target completion dates

APR reports are submitted to the Academic Board each December. The LTC prepares the APR in collaboration with relevant Program Directors. The Academic Dean certifies the APR before tabling.

#### 4.7 Subject Data Completeness and Curriculum Delivery Compliance

*Governed by: Curriculum Delivery Compliance Policy (adopted March 2026); HESF Standards 5.4, 7.2*

TIIS is obligated as a registered provider to deliver programs as registered with TEQSA and to maintain accurate records of student outcomes. The following obligations apply:

- Every subject in the registered program structure must have a documented delivery status: currently offered (with pass rate data), scheduled for future delivery (with rationale), or formally under review for removal.
- Subjects not offered for two or more consecutive years must be reviewed and a decision made on their ongoing inclusion in the program structure.
- Where subjects have not been delivered, TIIS must not represent those specialisation streams as available to prospective students in marketing or enrolment materials.

- Any substantive change to registered program delivery — including subject removal, mode change, or stream suspension — must be reported to TEQSA in accordance with Provider Registration Standards.

#### **4.8 Five-Year Major Course Review**

*Governed by: Course Review Policy; Major & Minor Review Procedure; HESF Standards 3.1, 5.3*

Each TIIS program undergoes a comprehensive Major Course Review on a five-year cycle, involving an external academic review panel, industry consultation, full AQF compliance mapping, and benchmarking against at least three comparable providers. Findings are reported to the Academic Board with a formal improvement plan and implementation timeline. For BBUS and BIT, the next scheduled Major Course Review is brought forward to 2027 in light of performance concerns identified in the 2026 review.

#### **4.9 External Referencing and Benchmarking**

*Governed by: Benchmarking Policy; External Referencing Guidelines; HESF Standard 5.4*

TIIS conducts annual external benchmarking for each program, comparing learning outcomes, graduate attributes, assessment standards, and pass rate profiles against comparable Australian providers. Benchmarking partners are approved by the Academic Board. Where benchmarking identifies significant divergence from sector norms, a formal response plan is required within 30 days of the LTC receiving the benchmarking report.

#### **4.10 Academic Integrity**

*Governed by: Academic Integrity Policy; AI-Assisted Work Guidelines; HESF Standards 1.4, 1.5*

TIIS maintains a comprehensive Academic Integrity framework addressing both traditional forms of misconduct (plagiarism, contract cheating) and emerging challenges including AI-generated content submission. All students complete mandatory academic integrity training at program commencement. All written assessments are submitted through plagiarism detection software. The AI-Assisted Work Guidelines define permitted use of generative AI tools for each assessment type, and non-compliance is treated as academic misconduct. Misconduct rates and outcomes are reported annually to the Academic Board.

#### **4.11 Equity, Diversity, and Inclusive Practices**

*Governed by: Equity and Diversity Policy; Inclusive Curriculum Guidelines; HESF Standards 2.2, 2.3*

TIIS serves a predominantly international student cohort, requiring a proactive and evidence-based approach to equity monitoring. Student performance data is routinely disaggregated by English language background, domestic/international status, gender, and age cohort to identify disparities in access, participation, and success. Where disaggregated data reveals that a specific student group is significantly underperforming relative to the program average, a targeted support response is developed and implemented within the same teaching period. Annual equity reporting is submitted to the Academic Board and included in the APR.

## 4.12 Academic Governance and Risk Management

*Governed by: Governance Charter; Academic Risk Framework; HESF Standards 6.1, 6.2, 6.3*

Academic governance at TIIS operates through a defined hierarchy: the Academic Board holds ultimate responsibility for academic standards and quality assurance; the Academic Dean has executive accountability for day-to-day quality management; and Program Directors and Coordinators are responsible for subject-level performance within their programs.

A formal QA Risk Register is maintained by the QA Unit and reviewed each semester. The Risk Register identifies current academic quality risks, assigns risk ratings, names responsible officers, and tracks mitigation actions to completion. The Register is tabled at each Academic Board meeting.

## 5. QA Implementation Roles and Responsibilities

| Role                                           | Key QA Responsibilities                                                                                                                                                            | Reports To          |
|------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| <b>Academic Board</b>                          | Endorses AQAF and major QA policies; receives quarterly ARP progress reports; approves APR outcomes; determines institutional response to TEQSA compliance matters.                | Board of Directors  |
| <b>Academic Dean</b>                           | Leads QA implementation; owns Threshold Trigger Policy and ARP process; certifies APR reports; escalates compliance risks; primary TEQSA contact for academic quality.             | Academic Board      |
| <b>Learning &amp; Teaching Committee (LTC)</b> | Reviews SELT data and teaching quality; initiates curriculum reviews triggered by thresholds; recommends assessment policy changes; oversees APR preparation.                      | Academic Dean       |
| <b>Board of Examiners</b>                      | Reviews grade distributions and moderation outcomes each teaching period; approves final results; investigates inter-offering variability referrals.                               | Academic Dean       |
| <b>Program Directors / Coordinators</b>        | Submit APR contributions; implement curriculum review outcomes; manage subject-level performance; activate at-risk monitoring; submit variability and teaching reflection reports. | Academic Dean / LTC |
| <b>Unit Coordinators</b>                       | Design assessments and rubrics; conduct pre- and post-moderation; submit feedback turnaround logs; flag at-risk students; participate in peer observation and CPD.                 | Program Director    |
| <b>QA Compliance Governance</b>                | Maintains QA Risk Register; manages review calendars and APR schedule; monitors pass rate data compliance; administers academic integrity records.                                 | CEO                 |
| <b>Registrar</b>                               | Provides academic records, pass rate datasets, progression data, and enrolment statistics for all QA reporting; ensures data completeness for all offered subjects.                | Academic Dean       |
| <b>Learning Support Unit</b>                   | Delivers bridging programs, academic writing workshops, and English language support; reports engagement and pass rate outcomes to Program Directors each term.                    | Academic Dean       |

|                         |                                                                                                                                                                                 |               |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| <b>Student Services</b> | Conducts student cohort profiling; supports equity monitoring; facilitates CALD and accessibility support; reports non-attendance at mandatory counselling to Program Director. | Academic Dean |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|

### 5.1 Academic Recovery Plan (ARP) Procedure

Where a program triggers the ARP threshold (overall pass rate <80%), the following procedure applies:

1. The Academic Dean initiates the ARP within 10 working days of the trigger being confirmed by the Registrar's data.
2. The ARP document is developed in consultation with the Program Director and submitted to the Academic Board within 30 calendar days.
3. The ARP must specify root cause analysis; curriculum and assessment remediation actions; student support enhancements; staffing review outcomes; measurable KPIs with target dates; and a pathway to achieving ≥80% within a defined timeframe.
4. Quarterly progress reports are tabled at Academic Board meetings.
5. If the program has not reached 80% within two annual review cycles from ARP commencement, the Academic Dean must notify TEQSA and develop an updated ARP with external review input.

|                           |                                                                                                       |
|---------------------------|-------------------------------------------------------------------------------------------------------|
| <b>Current ARP Status</b> | The BBUS ARP was formally initiated in March 2026, targeting ≥80% overall pass rate by December 2027. |
|---------------------------|-------------------------------------------------------------------------------------------------------|

## 6. Monitoring, Reporting, and Escalation

| Frequency                   | Owner                              | Output / Report                                                                                                        | Receiver(s)                          |
|-----------------------------|------------------------------------|------------------------------------------------------------------------------------------------------------------------|--------------------------------------|
| <b>Each Teaching Period</b> | Unit Coordinators / Registrar      | Subject pass rate data; moderation report; feedback turnaround log; at-risk intervention records                       | Program Director; LTC                |
| <b>Semester</b>             | LTC / Program Directors            | Semesterly Teaching Quality Report; SELT summary; grade distribution analysis; equity disaggregation update            | Academic Dean; Academic Board        |
| <b>Quarterly (ARP)</b>      | Academic Dean                      | ARP progress report for BBUS and any program on ARP status                                                             | Academic Board                       |
| <b>Quarterly (QIP)</b>      | Academic Dean / QA Unit            | Quality Improvement Plan status report                                                                                 | Academic Board                       |
| <b>Annual — December</b>    | Academic Dean / LTC                | Annual Program Review (all 5 programs); QA Risk Register update; equity audit; graduate outcomes; benchmarking summary | Academic Board; TEQSA (on request)   |
| <b>Annual — March</b>       | Registrar / Program Coordinators   | Curriculum Delivery Status Report (MCS and BIT subjects); marketing compliance confirmation                            | Academic Dean; Academic Board; TEQSA |
| <b>Five-Yearly</b>          | Program Directors / External Panel | Major Course Review; AQF compliance audit; full external benchmarking                                                  | Academic Board; TEQSA                |
| <b>February 2027</b>        | Academic Dean / QA Unit            | 12-Month TEQSA-Ready Follow-Up Review: pass rate outcomes vs. QIP targets                                              | Academic Board; TEQSA                |

## 6.1 QA Risk Register

The QA Risk Register is the primary instrument for identifying, rating, and tracking academic quality risks at TIIS. It is updated each semester by the QA Unit and tabled at Academic Board meetings.

| Risk                                                                                 | Likelihood     | Impact              | Mitigation                                                                                   | Owner                  |
|--------------------------------------------------------------------------------------|----------------|---------------------|----------------------------------------------------------------------------------------------|------------------------|
| <b>BBUS program below 80% at 2027 review</b>                                         | Medium         | Critical            | ARP active; quarterly reporting; at-risk system enhanced; curriculum reviews for BB101–BB105 | Academic Dean          |
| <b>MCS/BIT undelivered subject data gaps persist</b>                                 | Medium         | High                | Curriculum Delivery Status Report due April 2026; BCS/BMW audit in progress                  | Program Coordinator IT |
| <b>MPA503 chronic underperformance</b>                                               | High           | Moderate            | Pedagogical redesign underway; rubric review; assessment restructure                         | Program Director MPAA  |
| <b>Teaching staff quality insufficient for persistently underperforming subjects</b> | Medium         | High                | Teaching Quality Review procedure codified; mandatory CPD for flagged staff                  | Academic Dean / HR     |
| <b>Marketing materials misrepresent undelivered program streams</b>                  | Low–Medium     | High (TEQSA breach) | Marketing review underway; Curriculum Delivery Compliance Policy adopted                     | Registrar / Marketing  |
| <b>Small cohort data inflates/deflates pass rate reporting</b>                       | High           | Moderate            | Small-cohort flagging protocol in place; contextual commentary mandatory in all reports      | QA Unit                |
| <b>Delayed identification of emerging underperformance</b>                           | Low (post-APR) | High                | Annual APR now active; pass rate threshold trigger policy adopted; LTC oversight             | Academic Dean / LTC    |

## 7. Alignment with HESF (Threshold Standards) 2021

The following table confirms coverage of all relevant HESF domains against the AQAF framework components.

| HESF Standard   | Domain / Description                     | AQAF Coverage                                                                                | New in v2.1?                                     |
|-----------------|------------------------------------------|----------------------------------------------------------------------------------------------|--------------------------------------------------|
| <b>1.4, 1.5</b> | Learning outcomes and assessment quality | Sections 4.1, 4.3: AQF-mapped outcomes; standardised rubrics; moderation; feedback standards | ✓ Rubrics mandatory; variability review codified |

|                      |                                        |                                                                                                                    |                                                                 |
|----------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------|
| <b>2.2, 2.3</b>      | Equity and student support             | Sections 4.4, 4.11: At-risk identification; CALD-disaggregated monitoring; embedded language support; equity audit | ✓ Enhanced BBUS threshold; annual equity audit formalised       |
| <b>3.1, 3.2</b>      | Course design and learning environment | Sections 4.1, 4.8: AQF mapping; industry consultation; curriculum architecture; mode review                        | APR now triggers annual review                                  |
| <b>3.3</b>           | Academic staffing                      | Section 4.2: Qualification standards; peer observation; Teaching Quality Review process                            | ✓ Teaching Quality Review formally codified                     |
| <b>5.3, 5.4</b>      | Monitoring and review                  | Sections 4.5, 4.6, 4.7: Threshold policy; APR; five-year review; subject data compliance obligations               | ✓ APR, threshold policy, and data compliance policy new in v2.0 |
| <b>6.1, 6.2, 6.3</b> | Academic governance and integrity      | Sections 4.12, 5, 6: Risk Register; governance roles; ARP procedure; Academic Board reporting                      | ✓ QA Risk Register introduced; ARP procedure codified           |
| <b>7.1, 7.2, 7.3</b> | Representation and data                | Sections 4.7, 6: Curriculum delivery compliance; subject data completeness; marketing accuracy                     | ✓ New Curriculum Delivery Compliance Policy                     |

## 8. Continuous Improvement Cycle

TIIS's quality improvement model operates on a structured Plan–Do–Check–Act (PDCA) cycle embedded within the annual academic calendar. This ensures quality assurance is continuous and self-correcting, not episodic.

|              |                   |                                                                                                                                                                                         |
|--------------|-------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>PLAN</b>  | Feb–Mar each year | Review prior year APR outcomes. Set program and subject-level KPIs. Update QA Risk Register and Quality Improvement Plan. Confirm ARP milestones.                                       |
| <b>DO</b>    | Mar–Nov each year | Deliver programs. Implement curriculum improvements. Conduct peer observations. Run bridging and support programs. Execute teaching quality reviews. Administer SELT surveys.           |
| <b>CHECK</b> | June, Sep, Dec    | Compile pass rate data. Board of Examiners reviews. Moderation outcomes assessed. SELT analysis. ARP quarterly reports. Equity data disaggregated. LTC semesterly report.               |
| <b>ACT</b>   | Dec–Feb each year | APR finalised and tabled. Curriculum revisions approved. Staffing decisions enacted. Threshold triggers actioned. Benchmarking recommendations incorporated. TEQSA reporting completed. |

## 9. Document Approval and Review Schedule

|                                                    |                                                                                                                                |
|----------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------|
| <b>Prepared By</b>                                 | Academic Dean                                                                                                                  |
| <b>Creation Date</b>                               | March 2026                                                                                                                     |
| <b>Endorsed By</b>                                 | Academic Board                                                                                                                 |
| <b>Endorsement Date</b>                            | 08 April 2026                                                                                                                  |
| <b>Approved By</b>                                 | Board of Directors                                                                                                             |
| <b>Approval Date</b>                               |                                                                                                                                |
| <b>Next Review Date: March 2027 (Annual Cycle)</b> | Review Trigger (earlier if applicable): TEQSA compliance event, material program performance change, or major policy revision. |

*This Framework should be read in conjunction with all supporting policies referenced in Sections 4 and 5; and the TEQSA Provider Registration Standards.*

## Document Control

| Version    | Date       | Author        | Summary                                                                                                                                      |
|------------|------------|---------------|----------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1.0</b> | June 2025  | Academic Dean | Initial AQAF                                                                                                                                 |
| <b>2.0</b> | March 2026 | Academic Dean | Integrated Edition: v1.0 and v2.0 consolidated into unified, simplified document meeting and exceeding all TEQSA and HESF 2021 requirements. |

|                                                                                                             |                                                                                                                                                                                                                                                                                                           |
|-------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  <b>Version 2.0 Note</b> | <i>This Integrated Edition consolidates AQAF v1.0 into a single, simplified document. All material additions from v2.0 (pass rate thresholds, ARP procedure, Annual Program Review, Subject Data Compliance Policy, QA Risk Register) are retained and embedded into the unified framework structure.</i> |
