KEY INFORMATION

Award	Bachelor of Information Technology (BIT)
AQF Level	Level 7 (Bachelor Degree)
Total Units	24 units — 144 credit points
Duration	3 years full-time (6 trimesters) | 6 years part-time (domestic students only)
Delivery	Online & On-Campus — Block Mode (6 blocks/year × 6–7 weeks)
Campus	Sydney (Ultimo) — 13–15 Smail Street, Ultimo NSW 2007, Australia
Intakes	Block 1: February | Block 3: June | Block 5: October
Specialisations	Web & Mobile Applications Development | Cyber Security
Fees	Approx. $10,000 per trimester — $60,000 total tuition + $500 enrolment fee
Accreditation	TEQSA Registered Provider PRV14085 | ACS membership pathway (Cyber Security stream)

COURSE OVERVIEW

The Bachelor of Information Technology (BIT) prepares graduates to apply broad and coherent knowledge and skills as IT professionals across four key domains: networking, web and mobile application development, cyber security, and software development. The program integrates both technical mastery and transferable professional competencies — communication, teamwork, project management, and ethical practice — producing graduates who are workplace-ready from day one.

Students select one of two specialisations in their second and third years: Web & Mobile Applications Development, or Cyber Security. The program culminates in a Capstone Project that requires students to synthesise and apply all prior learning within an applied, industry-relevant context aligned to their chosen specialisation. Students who do not declare a specialisation undertake a general IT Capstone.

The BIT is delivered in Block Mode — six intensive 6–7 week blocks per academic year — and is available both online and on-campus. This format suits working students and provides structured, intensive learning that supports deep knowledge development.

COURSE STRUCTURE

Tier 1 — Core Subjects (17 compulsory, all students)

Subject Code	Subject Title
BB102	Business Communication
BB107	Business Information Systems
BB201	Business Intelligence and Data Analytics [Prerequisite: BB107]
BB204	Design Thinking and Digital Technology
BIT102	Programming Fundamentals
BIT103	Network Essentials
BIT104	Web Systems Development
BIT105	Database Management Systems
BIT106	ICT Project Management
BIT107	Introduction to Information Technology
BIT201	Cloud Computing
BIT202	Data Structures and Algorithms
BIT203	Software Design and Development [Prerequisite: BIT102]
BIT204	IT Profession and Ethics
BIT301	Emerging Trends in IT
BIT302	Internet of Things
BIT303	Capstone Project [Prerequisite: 120 credit points + BMW202 or BCS201]

Tier 2 — Specialisation Subjects (choose one stream, 7 units)

Subject Code	Subject Title
Stream A — Web & Mobile Applications Development	
BMW201	Object Oriented Programming [Prerequisite: BIT102]
BMW202	Web Application and Server Management [Prerequisites: BIT102 + BIT104]
BMW301	Mobile Application Development [Prerequisite: BMW202]
BMW302	Big Data and Analytics
BMW303	Advanced Web Application Development [Prerequisite: BMW202]
BMW304	ICT Business Analytics and Data Visualisation [Prerequisite: BMW302]
BMW305	Cloud Application Development [Prerequisite: BMW202]
Subject Code	**Subject Title**
Stream B — Cyber Security	
BCS201	Cyber Security Essentials [Prerequisite: BIT103]
BCS202	Human Factors in Cyber Security [Prerequisite: BCS201]
BCS301	Network Server and Administration [Prerequisite: BCS201]
BCS302	Cryptography [Prerequisite: BCS201]
BCS303	Computer Forensics [Prerequisite: BCS201]
BCS304	Cyber Law and Policy [Prerequisite: BCS201]
BCS305	Network Security [Prerequisite: BCS201]

To graduate, students must complete all 17 core subjects plus 7 specialisation subjects (from one or both streams), for a total of 24 subjects and 144 credit points. Students selecting both streams receive a cross-disciplinary BIT qualification. Students who do not declare a specialisation complete 7 general IT electives and undertake a general IT Capstone project.

DELIVERY MODE & BLOCK STRUCTURE

Block Mode Delivery — Online & On-Campus

TIIS delivers all programs in Block Mode: six intensive teaching blocks per academic year, each spanning 6–7 weeks. This structured format maximises student engagement, supports deep learning, and accommodates the needs of working professionals and international students alike. Online and on-campus modes maintain full curriculum, assessment, and outcome equivalence in accordance with HESF Standard 3.2.

Delivery Modes	Online (synchronous + asynchronous) and On-Campus — Sydney & Melbourne
Block Structure	6 blocks per academic year × 6–7 weeks per block
Units per Block	2 units (full-time); 1 unit (part-time, domestic students only)

Contact Hours	3 hours synchronous per subject per week (live online or face-to-face)
Self-Directed Study	7 hours per subject per week, plus 10 hours per final assessment task
Online Platform	Moodle LMS — live lectures, lecture recordings, discussion forums, digital resources
Sydney Campus	13–15 Smail Street, Ultimo NSW 2007, Australia
Melbourne Campus	Details available at www.tiis.edu.au
International Students	Must comply with visa conditions regarding study load and mode of enrolment

Online delivery utilises synchronous video conferencing with lecture recordings provided for flexible review. Assessment standards, learning outcomes, moderation processes, and academic support services are fully equivalent across all delivery modes. The online learning environment is hosted on Moodle and is accessible 24/7 from any location.

ASSESSMENT

The BIT employs a combination of formative and summative assessment across all subjects. Each subject normally includes three assessment items, with no single item exceeding 50% of the total unit mark. Group assessment tasks are limited to 30% of the total mark and always include an individual accountability component. Assessment forms vary by subject and may include written assignments, practical projects, lab exercises, presentations, quizzes, and examinations.

Teamwork Development

Teamwork is a core graduate attribute embedded throughout the BIT. Dedicated teamwork assessments are scaffolded progressively from BB102 (Business Communication) through BIT106 (ICT Project Management) and into the specialisation years. Students develop skills in collaborative planning, meeting management, project software, and cross-functional communication — giving them a significant competitive advantage in the IT labour market.

Early Alert Assessment

All subjects include an early low-stakes assessment task to gauge student engagement and identify students who may benefit from additional support. Students performing below expectation in these early tasks are proactively contacted to provide academic or non-academic assistance before issues escalate.

ADMISSIONS

Academic Entry Requirements

Applicants must satisfy one or more of: (a) completion of the NSW Higher School Certificate or equivalent, with a pass in Mathematics and an ATAR of at least 60, within the past two years; (b) completion of an AQF Level 5 Diploma or higher from a registered Australian higher education provider with a pass in Mathematics in Year 11 or 12; or (c)

completion of a recognised bridging or enabling course achieving at least 50% of the maximum mark. Alternative arrangements for applicants not meeting these criteria are available under Section 5 of the Student Selection and Admissions Policy.

English Language Requirements

IELTS 6.0 overall with no individual band below 6.0, or recognised equivalent. Applicants who have completed two years of Australian HSC within the last two years, or who hold an AQF Level 5 or higher qualification taught in English within the past two years, or who have resided or studied in an English-speaking country for five or more years, are deemed to satisfy this requirement.

Technology Requirements

Students are expected to have access to a modern computer (Windows 10/11 or macOS 10.7+) with at least 4GB RAM (8GB ideal), 150GB available disk space (250GB ideal), a minimum 2-core processor (8-core ideal), 1280×768 screen resolution (1920×1080 ideal), and minimum 5 Mbps internet connection (25 Mbps ideal). All course software is either free to download or provided by TIIS. Chromebooks are not recommended.

COURSE LEARNING OUTCOMES (AQF LEVEL 7)

Subject Code	Subject Title
K1	Exhibit broad and coherent theoretical and practical knowledge of ICT including networking, programming, cloud technologies, and cyber security, at a level consistent with professional IT practice
S1	Effectively communicate ICT knowledge and technical solutions to diverse audiences through a range of appropriate written, oral, and digital methods and channels
S2	Work successfully both independently and collaboratively to identify, analyse, and solve information and communication technology problems
S3	Anticipate the impact of ICT on business and society, and critically evaluate, research, and synthesise advanced tools and technologies to solve complex problems
A1	Apply in-depth knowledge, skills, and professional judgement to design, implement, and manage ICT solutions to diverse industry problems within accepted standards, policies, and practices
A2	Apply critical thinking and systematic problem-solving skills to analyse technical challenges and recommend well-reasoned, evidence-based solutions
A3	Apply knowledge of relevant regulatory frameworks, professional codes of conduct, and ethical principles in ICT professional contexts

CAREERS & EMPLOYMENT OUTCOMES

BIT graduates are prepared for entry-level and early-career roles across the full spectrum of the ICT industry:

- Software Developer / Applications Developer
- Web Designer and Developer / Full Stack Developer

- Mobile Applications Developer
- ICT Security Consultant / Cyber Security Analyst
- ICT Network Engineer / Support Specialist
- ICT Consultant / Systems Analyst
- Database Administrator / Data Engineer
- Computer/Software Engineer
- Security Engineer / Penetration Tester (Cyber Security stream)

BIT graduates with the Cyber Security specialisation may also articulate into the TIIS Master of Cyber Security (MCS) program, with credit consideration for relevant BCS stream subjects, subject to the TIIS Credit for Prior Learning Policy.

REGULATORY COMPLIANCE

TEQSA / HESF (Threshold Standards) 2021 — Regulatory Compliance

This program is registered with the Tertiary Education Quality and Standards Agency (TEQSA) under the Higher Education Standards Framework (Threshold Standards) 2021. Curriculum design, delivery modes, assessment practices, student support mechanisms, and quality assurance processes are designed to meet applicable HESF Standards including Standard 1 (Student Participation and Attainment), Standard 3 (Teaching), Standard 5 (Institutional Quality Assurance), and Standard 6 (Governance). The AQF level and volume of learning for this qualification comply with the Australian Qualifications Framework (Second Edition, 2013). Provider No: PRV14085.
