COURSE OVERVIEW

The Master of Professional Accounting (Advanced) is a 16-unit, four-block coursework degree designed for students who seek to extend their accounting knowledge to an advanced professional level. The MPAA is built on the core first 12-units which satisfies CPA Australia and CA ANZ professional accreditation standards — and adds four advanced units developed in direct consultation with the Association of Chartered Certified Accountants (ACCA).

The four advanced units in the final block are directly aligned to four ACCA Professional Level examinations. Students who successfully complete all four units are automatically eligible to sit the externally moderated ACCA membership examinations, providing a structured direct pathway to ACCA membership — the world's largest professional accounting body. This ACCA direct membership pathway is the key distinguishing feature of the MPAA program.

Graduates are equipped to operate as accredited professional accountants across a broad range of environments — from small independent practices through to government agencies and large commercial enterprises — working independently to manage complex business problems and deliver effective financial decision-making.
