Student Safety and Security & Procedure

1. Purpose

This Procedure sets out the practical arrangements TIIS uses to promote student safety and personal security, prevent and respond to safety and security incidents, and provide students with timely information, assistance, referral and follow-up.

It supplements the TIIS Work Health and Safety (WHS) Policy and supports TIIS's obligations under the ESOS Act and National Code Standard 6, the Higher Education Standards Framework (Threshold Standards) 2021, and applicable work health and safety / occupational health and safety requirements.

2. Scope

This Procedure applies to:

- all domestic and overseas students enrolled with TIIS;
- TIIS campuses and TIIS-controlled learning and student-service environments;
- TIIS-controlled student activities conducted off campus;
- online or blended learning where safety, security, online harassment or student wellbeing is relevant; and
- staff, contractors and other persons with responsibilities for student safety, security, support, emergency response or incident management.

This Procedure does not replace emergency services, the Critical Incident Policy and Procedure, Sexual Harm Prevention and Response Policy, WHS incident procedures or other specialist response arrangements. These processes may operate concurrently.

3. Regulatory and Governance Basis

Implementation of this Procedure must also take account of applicable national requirements concerning prevention of and response to gender-based violence in higher education, including commencement and transitional arrangements. Where another specialist TIIS procedure governs an incident, that procedure operates concurrently and prevails for its specialist reporting and response requirements.

- Education Services for Overseas Students Act 2000 (Cth) and National Code of Practice for Providers of Education and Training to Overseas Students 2018, particularly Standard 6.
- Higher Education Standards Framework (Threshold Standards) 2021, particularly Standard 2.3 (Wellbeing and Safety) and relevant governance and accountability requirements.
- Work Health and Safety Act 2011 (NSW) and Work Health and Safety Regulation 2025 (NSW), as applicable to TIIS's NSW operations.
- Occupational Health and Safety Act 2004 (Vic) and applicable Victorian OHS Regulations, as applicable to TIIS's Victorian operations.
- TIIS Constitution, Governance Charter, Delegations of Authority and relevant policies and procedures.

National Code Standard 6 requires TIIS to take all reasonable steps to provide a safe campus environment, advise overseas students and staff on actions that enhance personal security and safety, explain how students can seek assistance and report incidents affecting wellbeing, and provide or refer students to general safety and awareness information relevant to life in Australia.

4. Guiding Principles

Safety first: Immediate threats to life or serious injury take priority over administrative reporting.

Prevention and awareness: TIIS will use orientation, campus information, risk controls and timely communication to reduce foreseeable safety and security risks.

Accessible support: Students must be able to identify where and how to obtain help during normal campus operations and in an emergency.

Trauma-informed and respectful response: Students reporting an incident will be treated respectfully, with privacy protected to the extent permitted by law and operational necessity.

No retaliation: A student must not be disadvantaged for making a genuine safety report, seeking assistance or participating in an investigation.

Escalation according to risk: Serious, repeated, systemic or potentially critical incidents must be escalated promptly under the relevant TIIS governance and incident-management arrangements.

5. Responsibilities

The CEO is accountable for implementation and must provide the Board with a quarterly student safety and security report, including significant and critical incidents, emerging psychosocial and security risks, overdue corrective actions and material regulatory notifications. The Audit and Risk Committee (ARC) receives quarterly trend and control-assurance reporting; operational incident response remains with management.

Role	Responsibility
Board of Directors	Maintains governance oversight of material student safety and security risks through the WHS, risk and institutional assurance frameworks.
CEO	Ensures adequate systems, resources, delegations and escalation arrangements are maintained for student safety and security.
Registrar / Student Services	Coordinates student-facing safety information, support and referrals; maintains official student contact arrangements; records and escalates relevant incidents.
Campus Managers	Maintain local campus safety/security arrangements, emergency information, access controls, inspections and liaison with building management and emergency services as required.
Student Contact Officer(s)	Act as an official point of contact for overseas students and maintain current information about available support and referral services.
Quality and Compliance Manager	Conducts second-line monitoring, reviews incident trends and control effectiveness, and escalates material compliance or systemic issues.
All staff	Provide reasonable immediate assistance, follow emergency arrangements, report hazards/incidents and refer students to appropriate support.
Students	Take reasonable care for their own safety and that of others, follow lawful safety directions, use campus facilities appropriately and promptly report serious hazards or incidents.

6. Student Safety Information and Orientation

The Registrar must maintain a controlled student safety information checklist and verify, at least at each intake and following material changes, that current emergency contacts, campus-specific evacuation instructions, designated overseas student contact details, reporting channels and after-hours assistance arrangements are accessible. Student-facing staff must receive induction and refresher training on relevant ESOS Standard 6 obligations, safety reporting, referral pathways and privacy, consistent with the TIIS staff development requirements. Completion records must be retained.

TIIS must provide students, and particularly overseas students, with accessible safety and security information through orientation, the Student Handbook, LMS/website and campus communications as appropriate. Information should include:

- how to contact emergency services (000) and when emergency services should be used;
- campus emergency exits, evacuation arrangements, assembly points and emergency contacts;
- how to locate first aid assistance and report an injury or medical emergency;
- how to contact Student Services / the designated overseas student contact officer;
- how to report safety, security, harassment, sexual harm, violence, threats, stalking, theft or other incidents;
- personal safety awareness relevant to life in Australia, including travel, public transport, scams and after-hours safety where appropriate;

- health, counselling, wellbeing, legal and other referral services available to students; and
- relevant online safety and cyber-security expectations for online or blended learning.

Information provided to overseas students must be age and culturally appropriate and kept reasonably current.

7. Campus Safety and Security Controls

Campus Managers must document periodic inspections, building-management liaison, identified hazards, control owners and closure dates in a campus safety action log. A risk-based inspection schedule must be approved by the CEO or delegate. Emergency access and evacuation arrangements must be checked whenever premises, tenancy or delivery arrangements change.

Campus Managers must maintain controls appropriate to each campus and its risk profile. These may include:

- controlled access to teaching and staff areas where appropriate;
- clear identification of emergency exits and unobstructed evacuation routes;
- adequate lighting in TIIS-controlled areas and escalation of building-related lighting/security issues to the landlord or building manager;
- visitor management and contractor access arrangements proportionate to risk;
- regular checks of hazards, emergency information, first aid arrangements and security concerns;
- procedures for suspicious persons, threatening behaviour, theft, property damage or unauthorised access;
- reasonable arrangements for students or staff with disability or other needs during emergencies; and
- liaison with building management, security providers, police, ambulance, fire services or other authorities when required.

8. Immediate Response to a Safety or Security Incident

Where a student, staff member or other person becomes aware of an immediate safety or security incident, the following sequence applies, adapted to the circumstances:

1. Protect life and avoid further harm. Do not place yourself or others at unnecessary risk.
2. For immediate danger, serious injury, fire, violence or another emergency, call 000 and follow emergency instructions.
3. Alert campus staff / Campus Manager and activate the campus emergency or evacuation process where required.
4. Provide or arrange first aid and other immediate assistance within the responder's competence.
5. Move affected persons to a safe location where practicable.
6. Preserve an incident scene and evidence where required by police, WHS/OHS law or another authority.
7. Record and escalate the incident under Section 10 of this Procedure.

9. Specific Incident Pathways

9.1 Medical emergency or injury

Call 000 where urgent medical assistance is required. Arrange first aid, notify the Campus Manager, and record the incident. Where the event involves a worker or workplace hazard, apply the WHS incident and regulator-notification process as required.

9.2 Threats, violence or suspicious behaviour

Do not confront a person where doing so may increase risk. Contact police through 000 for immediate danger or the appropriate non-emergency channel where the threat is not immediate. Campus access may be restricted where lawfully necessary to protect safety.

9.3 Sexual harm, harassment, bullying or discrimination

Provide immediate safety assistance and refer the matter to the Sexual Harm Prevention and Response Policy or Harassment, Bullying and Unlawful Discrimination arrangements as applicable. Emergency or criminal matters may also require police or medical assistance. The student's choices and privacy should be respected subject to mandatory legal or safety obligations.

9.4 Theft, loss or property damage

Students should report theft or serious property damage to Student Services / Campus Management and, where appropriate, police. TIIS will preserve available evidence within its control and assist with reasonable information required for a police or insurance report.

9.5 Online safety or cyber incident

Threatening communications, impersonation, online harassment, compromised accounts or other cyber-security incidents affecting TIIS learning environments must be reported promptly. TIIS may restrict access, preserve relevant records and escalate the matter under its cybersecurity, conduct, complaints or critical-incident arrangements.

9.6 Student missing, unreachable or serious welfare concern

Where there is a reasonable concern for a student's immediate safety or welfare, Student Services must assess urgency, attempt appropriate contact and escalate to the CEO / authorised manager. Police, emergency services or other authorities should be contacted where the circumstances indicate an immediate or serious welfare risk. For overseas students, relevant ESOS and critical-incident requirements must also be considered.

10. Reporting, Classification and Escalation

Reporting timeframes: emergencies must be referred to emergency services immediately; critical incidents must be escalated to the CEO, Registrar and Quality and Compliance Manager immediately once safe to do so; significant incidents must ordinarily be escalated within one business day. These internal targets do not replace any shorter statutory notification period. The Registrar maintains a Student Safety and Security Incident Register, recording incident ID, classification, affected campus or learning environment, date, response, support, notifications, investigation, actions, responsible officer, due date, verification and closure.

All material student safety/security incidents must be recorded promptly. The receiving staff member or responsible manager must determine the appropriate pathway:

Level	Indicative circumstances	Required response
Routine / Low	Minor hazard, minor first aid, lost property or security concern without continuing threat.	Resolve locally where possible; record where required; monitor for recurrence.
Significant	Injury requiring external treatment, serious threat, assault allegation, repeated harassment, significant theft, substantial wellbeing impact or serious security failure.	Notify Campus Manager and Registrar / Student Services promptly; provide support; investigate and implement corrective action; notify CEO/Compliance where material.
Critical / Emergency	Death, life-threatening injury, serious violence, major emergency, missing student with serious welfare concern, event causing significant physical or psychological harm or materially affecting ability to continue study.	Emergency response; immediate CEO and Compliance escalation; activate Critical Incident Policy and Procedure; consider police/emergency services, WHS/OHS regulator and other regulatory notifications.

Classification is based on actual and potential consequence, not merely on whether physical injury occurred. A psychosocial or security event may be critical where it creates serious risk or significantly affects a student's wellbeing or capacity to study.

11. Critical Incidents and ESOS

The Registrar must cross-reference any qualifying incident in the Critical Incident Register maintained under the Critical Incident Management Policy and Procedure, with quarterly reporting to the ARC. A documented assessment must identify whether police, WHS/OHS regulators, ESOS/PRISMS or other external notifications are required, by whom and by when. The existence of a safety report does not itself establish that PRISMS notification is required.

Where an incident could affect an overseas student's ability to undertake or complete a course, TIIS must consider whether the Critical Incident Policy and Procedure applies. National Code Standard 6 requires TIIS to maintain a written record of a critical incident and remedial action for at least two years after the overseas student ceases to be an accepted student.

The Registrar / Student Services and Quality and Compliance Manager must ensure that any required ESOS, PRISMS or other regulatory action is considered. Safety/security records must be linked or cross-referenced to the critical-incident record where both processes apply.

12. Support and Follow-up

The responsible Student Services officer must document the support offered, agreed follow-up arrangements and whether reasonable academic adjustments or specialist referrals are required. The affected student must be told how to raise a complaint or seek review without retaliation, subject to confidentiality and procedural fairness.

Following a significant incident, TIIS must consider reasonable support and follow-up, including as appropriate:

- medical, counselling or wellbeing referral;
- academic support or reasonable short-term adjustments;
- information about complaints, appeals, police or legal assistance;
- safety planning or changes to campus access arrangements;
- contact with an emergency contact where lawful and appropriate;
- follow-up contact with the affected student; and
- review of whether the incident indicates a broader hazard, control weakness or systemic risk.

13. Incident Investigation and Corrective Action

The Registrar must track significant and critical incident corrective actions in the incident register, and the Quality and Compliance Manager must independently sample evidence of completion. Overdue or ineffective actions must be escalated to the CEO and reported to the ARC where material or systemic.

Significant and critical incidents must be reviewed proportionately to identify immediate causes, contributing factors, control failures and corrective actions. Investigations should focus on prevention and accountability and must not unnecessarily duplicate police, regulator or specialist investigations.

Corrective actions must identify an owner and due date and be tracked to completion. Material or systemic findings must be entered in the relevant risk/compliance register and reported through the Governance Charter arrangements.

14. Records, Privacy and Confidentiality

Records of a critical incident affecting an overseas student, including remedial action, must be retained for at least two years after that student ceases to be an accepted student, or longer where other legal or TIIS retention requirements apply. Access must be restricted on a need-to-know basis; reports to governance bodies should be de-identified where practicable.

TIIS must maintain records appropriate to the nature of the incident, which may include:

- date, time and location;
- persons involved and witnesses, where appropriate;
- description of the incident or hazard;
- immediate response and emergency-service involvement;
- support or referral offered;
- notifications and escalation;
- investigation findings and corrective actions; and
- closure and follow-up.

Personal, health and sensitive information must be handled in accordance with applicable privacy law and TIIS privacy and records-management requirements. Information should be shared only where there is a lawful and legitimate need, including safety, investigation, regulatory or support purposes.

15. Monitoring and Assurance

The Registrar must submit a quarterly summary to the CEO and ARC covering incident numbers and severity, response timeliness, recurring hazards, support and referral outcomes, statutory notifications where applicable, and open or overdue actions. The CEO must provide the Board with quarterly assurance and immediately escalate material or systemic safety failures. The Quality and Compliance Manager must perform a documented risk-based review at least annually and report exceptions and remediation progress.

TIIS will periodically monitor student safety and security arrangements through:

- campus safety/security inspections and review of emergency information;
- analysis of incident, hazard and complaint trends;
- review of student feedback and relevant wellbeing indicators;
- testing of emergency and evacuation arrangements;
- review of completion of corrective actions;
- sampling by the Quality and Compliance Manager; and
- management and Board reporting of material or systemic risks.

16. Related TIIS Documents

The Registrar and Quality and Compliance Manager must confirm that each referenced specialist policy or plan is current and approved before publication of this Procedure. Where a document is not yet approved, the relevant incident must be managed through the applicable approved procedure and statutory obligations; an unapproved document must not be represented as an operative control.

- Work Health and Safety (WHS) Policy
- Safety and Security Policy (if retained as a separate policy)
- Critical Incident Policy and Procedure
- Student Support & Wellbeing Policy
- Sexual Harm Prevention and Response Policy
- Harassment, Bullying and Unlawful Discrimination Prevention and Response Policy
- First Aid arrangements
- Emergency and Evacuation Procedures
- Student Complaints and Appeals Policy and Procedure
- Student and Staff Codes of Conduct
- Cybersecurity / Data Security Policy
- Privacy Policy
- Risk Management Policy
- Student Handbook
- Governance Charter and Delegations of Authority

17. Review

The CEO is responsible for initiating review and submitting material changes for approval in accordance with the Governance Charter and Delegations of Authority. Reviews must consider incident trends, student feedback, campus risk assessments, applicable regulatory changes and assurance findings.

This Procedure will be reviewed at least every two years and earlier following a critical incident, material safety/security event, significant change to a campus or delivery model, regulatory change, repeated incident trend, or material assurance finding.

18. Document Control

Procedure title	Student Safety and Security Procedure
Document type	Operational Procedure

Version	1.1
Policy owner	CEO
Operational owner	Registrar / Student Services, with Campus Managers
Compliance assurance	Quality and Compliance Manager
Approval authority	CEO / Executive Management Team, only to the extent authorised by the Governance Charter and Delegations of Authority; Board oversight of material student safety risks
Parent policy	Work Health and Safety (WHS) Policy
Effective date	On approval
Review cycle	At least every two years, or earlier following material incident, regulatory change or identified control weakness

19. Version History

Version	1.1 – Draft for approval	Approval date	Effective date	Details
1.0	EMT	Pending	On approval	Original draft supplementary procedure supporting WHS Policy, ESOS Standard 6 and HESF 2.3; approval remains to be verified.
1.1	CEO / EMT	22 October 2026	22 October 2026	Refined controls, registers, escalation, governance assurance and alignment with WHS and critical incident arrangements.

Appendix A - Student Safety Quick Response

Situation	Immediate action
Immediate danger / serious injury / fire / violence	Call 000. Move to safety if possible. Follow emergency instructions. Notify TIIS campus staff.
Medical issue not immediately life-threatening	Seek first aid / medical assistance and notify Student Services or Campus Management.
Threat, harassment or sexual harm	Move to safety; call 000 if immediate danger; contact Student Services; use the relevant TIIS reporting/support pathway.
Theft / property crime	Report to Campus Management / Student Services and police where appropriate.
Safety hazard	Keep away from the hazard where possible and report it promptly to TIIS staff.
Serious wellbeing concern	Contact Student Services / the designated student contact officer; call emergency services where there is immediate danger.
